

Blank Slate

A Parody to T. Swifts Blank Space.

Brining light to multiple methods of assessment.

Verse 1:

Hello Creativity.
I can be almost anything.
Not just only asking me
Did you memorize everything?
Oh my gosh, why not?
Scantron bubbles are at stake.
Your future is at stake.
Hold a sec, what did you say?

Verse 2:

Are you sure that is ok?
I didn't see that in the manual.
What is that, come again.
Did you say multiple methods?
Listen here, is this what you mean
Assessing kids isn't the end?

Chorus:

This a new style
It may take some more time.
There is not just one way
To explain my thoughts.
There are many creative ways
To show you all my gains
Got a lot of knowledge stored
Up in my brain

There is value and there's power
When you step back.
Which approach do you chose?
There are four.
There are many creative ways
To show you all my gains
I now have a blank slate
To make a name

Verse 3:

If you're looking to asses
A person's individuality.
Guliford's Model might be best.
Used to measure creativity.
Using 4 measures.
Fluency, flexibility.
Hold on you say there's still more?
Originality.
And then you say there's one more.
Elaboration.
These focus on output
And all need quantity.

Chorus:

This a new style
It may take some more time.
There is not just one way
To explain my thoughts.
There are many creative ways
To show you all my gains
Got a lot of knowledge stored
Up in my brain

There is value and there's power
When you step back.
Which approach do you chose?
There are four.
There are many creative ways
To show you all my gains
I now have a blank slate
To make a name
